	Claims	_____	NO

2. Citations and explanations (Rule 70.7)

The claimed invention relates to a connecting device for connecting discharging devices to packages with liquid products. In order to prevent the wrong package from being connected to the dispensing device, the coupling devices that connect the package with the dispensing device are given a quadrilateral, pentagonal or hexagonal shape adapted to each other. The edge portions that extend between the corners are concave and arcuate.

Documents cited in the International Search Report:

D1: WO, 0226586, A1
 D2: SE, 445 824, B
 D3: SE, 514 699, C2

The cited documents represent the general state of the art. The invention defined in claims 1-8 is not disclosed by any of these documents. The cited prior art does not give any indication that would lead a person skilled in the art to the claimed connecting device provided with two connecting members having a concave and arcuate cross section such as to make them more difficult to deform. Therefore, the claimed invention is not obvious to a person skilled in the art.

Accordingly, the invention defined in claims 1-8 is novel and is considered to involve an inventive step. The invention is industrially applicable.
